## LATEST UPDATES FROM THE CLOUD ACCOUNTING EXPERTS

BUSINESS UPDATE

'Its time to change to the dynamic environment that is the cloud'

For many of us working remotely has highlighted further the strength of cloud accounting software like Xero Practice Manager

We've seen a real shift in attitude towards cloud accounting during the last few months. Online meetings are now the norm, clients are looking at technology to automate processes and minimise labour costs and accountants who were operating on server based systems have realised it's time to change to the dynamic environment that is the cloud.

The work anywhere ability of these cloud based systems and our dashboards has meant that partners and directors can monitor the health of their practice without stepping foot in the office.

If you're a practice that loves Xero and wants to look at being fully cloud based, get in touch

THE FULL PRACTICE DASHBOARDS

Under the hood of a
cloud accounting stack
29 September | 11am
Register now

Join us for a joint webinar with Practice Ignition and SuiteFiles, our XPM guru Sam King will talk you through our app stack and demonstrate the full automation you can get when using these apps

Processes and Technology are the two most important elements of running an accounting practice and now more than ever it's key that you run your business in the cloud.
The most seamless process possible is Practice Ignition > XPM > SuiteFiles > Power BI.

In the webinar you'll uncover how to:
✔ Standardise your processes
✔ Invest in tech that removes human resources
✔Choose best of breed tech that integrates
